

MAHAMMAD FAIZAL

Mangalore, India • +91 73530 90355 • mfaizalf72@gmail.com • [linkedin.com/in/mfaizalf72](https://www.linkedin.com/in/mfaizalf72) • github.com/mfaizalf72

PROFESSIONAL SUMMARY

Computer Science Engineering graduate and Java Full-Stack Developer with hands-on experience building web applications using Java, Spring Boot, React.js, MySQL, and REST APIs. Skilled in JWT Authentication, Role-Based Access Control (RBAC), JPA/Hibernate, CRUD operations, and full-stack deployment. Built a secure Enterprise RAG Intelligence System with document-level RBAC, authorized retrieval, and audit logging. Also experienced as a Project Planning & Operations Engineer at PlantTech Arabia under a Saudi Aramco contract, with strong documentation and reporting discipline.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, Python Basics, C/C++

Backend: Spring Boot, Spring MVC, Spring Security, JWT, REST APIs, JPA, Hibernate, JDBC

Frontend: React.js, Vite, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Databases: MySQL, PostgreSQL Basics, MongoDB Basics, SQLite

Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Railway, Vercel, Chrome DevTools

Core Concepts: OOP, Collections, Exception Handling, MVC Architecture, CRUD Operations, RBAC, API Integration, Agile Basics, RAG Concepts

PROFESSIONAL EXPERIENCE

Full-Stack Developer Intern

ExcelR Solutions

Aug 2025 – Present

Bengaluru, Karnataka, India

- Developed full-stack web applications using Java, Spring Boot, React.js, MySQL, REST APIs, and Hibernate/JPA across sprint-based projects.
- Built and secured backend REST APIs with JWT Authentication and Role-Based Access Control; enforced server-side authorization on every API route.
- Designed normalized MySQL schemas and implemented CRUD operations using JPA/Hibernate ORM.
- Integrated React.js frontends with Spring Boot APIs using async JavaScript; built reusable, responsive UI components using Tailwind CSS.
- Tested all API endpoints in Postman – validating HTTP methods, status codes, request bodies, and edge cases before frontend integration.
- Debugged full-stack issues using Chrome DevTools and structured backend logging to isolate root causes at the network, backend, or database layer.
- Practiced Git feature branching, pull requests, and Agile sprint workflow; prepared applications for production deployment using Railway and Vercel environment configuration.

Project Planning & Operations Engineer

PlantTech Arabia | Saudi Aramco Contract

Jan 2025 – Jul 2025

Riyadh, Saudi Arabia

- Tracked daily project progress and maintained structured records to monitor schedule adherence across a large-scale Saudi Aramco infrastructure project.
- Compared planned vs. actual progress to identify delays, work gaps, and schedule deviations; escalated issues with supporting data.
- Prepared weekly KPI reports, progress summaries, and schedule updates for project review meetings with engineering and client stakeholders.
- Coordinated with engineering, procurement, site, and client teams to collect accurate updates and resolve reporting inconsistencies.
- Maintained documentation discipline and ensured data accuracy under strict deadline pressure in a high-stakes enterprise environment.
- Supported workflow tracking and operational planning activities throughout the project lifecycle, contributing to structured decision-making.
- Improved reporting clarity by organizing project data into structured formats, making information easier to review and act upon.

PROJECTS

Enterprise RAG Intelligence System / LLM Logging System

2025

Code: github.com/mfaizalf72

React.js, Node.js, Express.js, JWT, RBAC, SQLite, REST APIs, Document Chunking, Audit Logging

- Upgraded an LLM inference logging system into a secure Enterprise RAG Intelligence System with JWT authentication and role-based access control.
- Implemented document upload with metadata tagging – including department, sensitivity level, and allowed roles – for controlled document access.
- Built document chunking and authorized retrieval so only permitted chunks are returned; applied RBAC before retrieval to ensure unauthorized chunks are never retrieved or passed to answer generation.
- Added citation-based response generation and audit logging to record user queries, roles, retrieved documents, and generated responses.
- Supported roles: Admin, Finance, HR, Engineering, Compliance, and Employee, each with scoped document access rules.

Team Task Manager App

2026

Code: github.com/mfaizalf72/team-task-manager-frontend

React.js, Spring Boot, MySQL, REST APIs, JWT Auth, JPA/Hibernate, Railway, Vercel

- Full-stack task management application with Admin and Member roles, JWT-secured login, and role-based dashboard views.
- Built Spring Boot REST APIs for project creation, member management, task assignment, task status updates, and task deletion with server-side RBAC on every route.
- Designed a normalized MySQL schema managed with JPA/Hibernate; integrated React.js frontend using Tailwind CSS.
- Deployed backend on Railway and frontend on Vercel with full production configuration including environment variables and CORS setup.

FoodScribe — Food Ordering & Subscription Platform

2025

Code: github.com/mfaizalf72/FoodScribe

Java, Spring Boot, Hibernate ORM, MySQL, REST APIs, Railway

- Food ordering and subscription management platform with order tracking, subscription lifecycle management, and an admin operational dashboard.
- Built 15+ REST APIs backed by an 8-table normalized MySQL schema; implemented the DTO pattern to cleanly separate internal data models from API responses.
- Applied Hibernate ORM for all database operations; tested all endpoints in Postman and deployed backend on Railway with production-ready configuration.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering

Graduated May 2024

Srinivas Institute of Technology, Mangalore

CGPA: 7.51 / 10 • Coursework: Data Structures, OOP, DBMS, Software Engineering, Computer Networks

CERTIFICATIONS

- Salesforce Developer Virtual Internship
- Cisco Cyber Security Essentials
- Cisco Introduction to Cyber Security
- Information Technology Specialist – Network Security
